

2020 Street Rehabilitation Weekly Construction Update 8/28/2020

Current Events

All utility work including hydrant replacements and storm sewer improvements is now complete.

Future Events

Next week the contractor will begin removing broken or damaged sections of concrete curb and gutter throughout the project. Installation of the new curb in areas that were removed is anticipated to begin on September 1st, weather permitting. The contractor has also indicated they will begin road reconstruction activities the week of September 8th.

Resident Access

The City and Contractor will do everything possible to minimize inconvenience to residents in the construction areas. Residents must realize, however, that this type of construction will generate noise, dust, and mud, and is generally a disruption to the area.

Residents will have access to their driveways during construction except when major construction events are occurring on their block.

It is very important that people drive slow and watch out for workers and equipment when in the construction areas. Driving slowly not only reduces accidents, but also reduces dust, which can be a problem during dry spells.

Weekly construction updates will be posted on the City website at the following link:

<https://www.newbrightonmn.gov/departments/community-assets-development/community-assets-utilities-streets/construction-streets/>

In case of emergency, call 911

www.ci.new-brighton.mn.us

Contractor's hours will be from 7:00 a.m. to 7:00 p.m., Monday through Friday while performing major construction activities. Some work will be done on Saturdays.

This project covers several areas so there will be times when you will not see continuous construction activities on your street or near your home, because the Contractor is working in another area of the project.
