Generator quote for FD

Additional information regarding the condition of the building or grounds

The company 1 FD has a whole building generator that is too small to run the entire building at full capacity. In addition, the current generator will reach its estimated life cycle in 2028/2029 and will need replacement.

The company 1 FD is also used at an emergency shelter and will need a reliable emergency power supply.

The attached quote is for generator and ATS only. The additional amount is for installation, site work and propane tanks.
