* Intent is to connect lower farm access driveway to existing top of Main driveway to create a loop and easier access for future potential farming activities.
* Driveway already has an paved Apron 15' from the road permitted / installed / inspected and approved by the town (New)
* Driveway will be 10' wide including a small swale at the top and bottom
* Area to be removed is all grass on an natural slope / levels to be cleared of 6" of loam and replaced with 3" of processed gravel base and 3" of 3/4 clean trap rock stone compacted. Additional loam used to clean up edges and backfill small slope.
* Driveway slope is >4% with solid undisturbed bank on left above driveway grade and small 20' shoulder with 4' flaird edge to accomodate 2' rise in elevation
* Installation of 2 → 18' ABS Comsated drain pipes installed to fiirther help any transferrance of ground or overflow water from one side to the other.
* 300' of driveway is flush to finish ground level only front right curtain at top is elevated to allow longer slope and easier rise.
* Silt fence was used throughout all material removal has since been remaved and now has grass.
