RE: Tree Removal at Holbrook Residence
16 4th Ave., Nyack, NY 10960

Dear Don,

I have been contracted by the Holbrooks' to remove 9 trees in their landscape. Below is my reason for removal for each tree in the landscape. These trees are being removed because of the intolerable risk they present to the client's liability, life, and property.

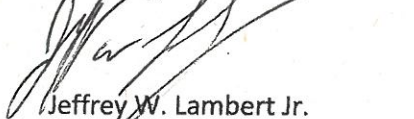

1. Hackberry-12" DBH-Limited root space between house and driveway, high risk to house and cars.
2. Hackberry-18" DBH-Trunk defects, history of failure, high risk to house and cars.
3. (5) Norway Maples-12" DBH-NYSDEC invasive species, limited root space, most in poor condition, high risk to structures on property.
4. Ailanthus-40" DBH-NYSDEC invasive species, limited root space, high risk to Ackerman properties and utilities.

My proposal to remove these trees will not adversely affect other plants in the landscape nor create drainage/flooding issues. We are planting trees in their place.

All work will be performed to ANSI A300 and Z1331.1 standards and local laws/regulations.

I am a certified arborist in New York State. MY certification # is NY-6334A. Nothing in this document is to be construed as a tree risk assessment. Please do not hesitate to contact me with any questions or concerns by email: Jeff@irawickes.com

Sincerely,

Jeffrey W. Lambert Jr.
