# AZEK® Trim with Protective Film

AZEK Trim is cellular PVC with a crisp white semi-matte finish providing years of low maintenance for homeowners. To ensure that it looks as beautiful on your homes as it does when it leaves our facilities, our Classic AZEK Trim in Smooth and Woodgrain finish is now produced with a protective film.

AZEK Trim with protective film should be kept dry prior to installation. Do not expose film to direct sunlight for extended periods. Protective film can be removed prior to, during or immediately after installation.

## AZEK TRIM FILM WILL BE ON THE FOLLOWING SMOOTH AND WOODGRAIN TRIM PRODUCTS

## Classic AZEK Trim, Smooth and Woodgrain

AZEK Trim is a finishing touch that is far superior to wood. AZEK Trim is more durable and keeps its appearance longer with little maintenance. It is easily milled, routed, and heat formed for exquisite custom looks or curved applications. No staining or sealing needed. AZEK Trim is easily painted for personal styling.

## AZEK Trim with PaintPro® Technology

No primer needed. Get work finished faster thanks to quicker drying time. PaintPro can be handled 30 minutes after painting. AZEK Trim with PaintPro technology has all the benefits of AZEK Classic Trim including being virtually impervious to moisture, but also adds the benefit of a superior paint bond that enhances long-term performance.

## Classic AZEK Sheet

Applications over 16" wide are easy with Classic AZEK Sheet. Ideal for use in bay windows, dormers and raised panels.

## PaintPro Sheet

Applications over 16" wide are easy with AZEK PaintPro Sheet. Ideal for use in bay windows, dormers, and raised panels.

**EKENA**  
MILLWORK

# Ekena Millwork Cellular PVC MSDS

## 1. Identification

### 1.1. Product Identifier

Product name: Ekena Millwork PVC Trimboard and Sheet

Alternate name: Ekena Millwork Ecel-100/Ecel-1500 Trimboard and Sheet

### 1.2. Intended Use Of The Product

Use of the substance/mixture: Trim/Molding/Architectural components on the Exterior/Interior of buildings

### 1.3. Name, Address, And Telephone Of The Responsible Party

## MANUFACTURER

**Ekena Millwork**

**2300 W. Main Street**

**Clarksville, TX 75426**

**866-607-0453**

**866-591-3143**

## 2. Hazard(s) identification

### 2.1. Classification of the substance or mixture

GHS-US classification

Not Classified. Within the meaning of the OSHA Hazard Communication Standard [29 CFR 1910.1200]: this mixture is not considered a hazard when used in a manner which is consistent with the labeled directions. This mixture is considered an article in its final form.

### 2.2. Label elements

Using the Toxicity Data listed in section 11 and 12 the product is labeled as follows. No applicable GHS categories.

**[Prevention]: No GHS prevention statements**

**[Response]: No GHS response statements**

**[Storage]: No GHS storage statements**

**[Disposal]: No GHS disposal statements**

### 2.3. Other Hazards

Other Hazards Not Contributing to the Classification: Cutting, sawing, grinding, or other operations that generate dust may raise nuisance particles that can cause mechanical irritation to the skin, eyes, or respiratory tract.

### 2.4. Unknown acute toxicity (GHS US)

No data available

## 3. Composition/information on ingredients

### 3. Composition/information on ingredients

This product is an article as defined in 29 CFR 1910.1200. It will not result in exposure to hazardous chemicals under normal conditions of use. This product is not subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR Part 372.

This product contains the following substances that present a hazard within the meaning of the relevant State and Federal Hazardous Substances regulations.

Ingredient/Chemical Designations	Weight %	GHS Classification	Notes
<b>PVC (Chloroethylene, polymer) CAS Number: 0009002-86-2</b>	<b>&gt; 70%</b>	<b>Not Classified</b>	
<b>Titanium dioxide CAS Number: 0013463-67-7</b>	<b>&lt; 10%</b>	<b>Not Classified</b>	
<b>Calcium carbonate CAS Number: 0001317-65-3</b>	<b>&lt;15%</b>	<b>Not Classified</b>	

In accordance with paragraph (i) of §1910.1200, the specific chemical identity and/or exact percentage (concentration) of composition has been withheld as a trade secret.

[1] Substance classified with a health or environmental hazard.

[2] Substance with a workplace exposure limit.

[3] PBT-substance or vPvB-substance.

## 4. First aid measures

### 4.1. Description of first aid measures

First-aid measures general: If injury occurs or if you feel unwell seek medical attention or advice.

First-aid measures after inhalation: Not expected to present a significant inhalation hazard under anticipated conditions of normal use. Remove to fresh air, keep patient warm and at rest. If breathing is irregular or stopped, give artificial respiration. If unconscious place in the recovery position and obtain immediate medical attention. Give nothing by mouth. Obtain medical attention if breathing difficulty persists.

First-aid measures after skin contact: None expected under normal conditions of use. Obtain medical attention if irritation develops or persists. If burned by molten plastics, get medical attention immediately.

First-aid measures after eye contact: Adverse effects not expected from this product. Irrigate copiously with clean water for at least 15 minutes, holding the eyelids apart and seek medical attention. Obtain medical attention if pain, blinking or redness persist.

First-aid measures after ingestion: Not expected to be a primary route of exposure. If swallowed obtain immediate medical attention. Keep at rest. Do NOT induce vomiting. Obtain emergency medical attention.

### 4.2. Most important symptoms and effects, both acute and delayed

Overview: During a fire emergency, when this product is burned, it may generate smoke.

Symptoms/injuries: Not expected to present a significant hazard under anticipated conditions of normal use. Prolonged contact with large amounts of dust may cause mechanical irritation. Final product may have sharp edges.

Symptoms/injuries after inhalation: Not expected to present a significant inhalation hazard under anticipated conditions of normal use.

Symptoms/injuries after skin contact: Not expected to be a primary route of exposure. Risk of thermal burns on contact with molten product.

Symptoms/injuries after eye contact: Not expected to be a primary route of exposure. Excessive dust production at the time of cutting may cause minor eye irritation.

Symptoms/injuries after ingestion: Ingestion is not considered a potential route of exposure.

#### 4.3. Indication of any immediate medical attention and special treatment needed

If you feel unwell, seek medical advice (show the label where possible).

## **5. Fire-fighting measures**

### 5.1. Extinguishing media

Suitable extinguishing media: Use extinguishing media appropriate for surrounding fire.

Unsuitable extinguishing media: Do not use a heavy water stream. Use of heavy stream of water may spread fire.

### 5.2. Special hazards arising from the substance or mixture

Fire hazard: Not considered flammable but may burn at high temperatures.

Hazardous decomposition: If burned, will generate carbon dioxide, carbon monoxide, HCl

Explosion hazard: Product is not explosive.

Reactivity: Hazardous reactions will not occur under normal conditions.

### 5.3. Advice for firefighters

Precautionary measures fire: Exercise caution when fighting any chemical fire.

Firefighting instructions: Use water spray or fog for cooling exposed containers.

Protection during firefighting: Do not enter fire area without proper protective equipment, including respiratory protection.

Other information: Do not allow run-off from fire fighting to enter drains or water courses.

## **6. Accidental release measures**

### 6.1. Personal precautions, protective equipment and emergency procedures

General measures: Avoid breathing (dust, vapors, fumes from molten material). Final product may have sharp edges.

#### 6.1.1. For non-emergency personnel

Protective equipment: Use appropriate personal protection equipment (PPE).

Emergency procedures: Evacuate unnecessary personnel.

#### 6.1.2. For emergency responders

Protective equipment: Equip cleanup crew with proper protection.

Emergency procedures: Ventilate area.

### 6.2. Environmental precautions

Prevent entry to sewers and public waters. Use good personal hygiene practices. Wash hands before eating, drinking, smoking or using toilet. Promptly remove soiled clothing and wash thoroughly before reuse.

### 6.3. Methods and material for containment and cleaning up

For containment: Avoid generation of dust during clean-up of spills. Sweep or vacuum the product to recover it.

Methods for cleaning up: Clear up spills immediately and dispose of waste safely.

### 6.4. Reference to other sections

See heading 8, exposure controls and personal protection.

## **7. Handling and storage**

### 7.1. Precautions for safe handling

Additional hazards when processed: Avoid dust production. Final product may have sharp edges. Risk of thermal burns on contact with molten product. Cutting, sawing, grinding, or other operations that generate dust

may raise nuisance particles that can cause mechanical irritation to the skin, eyes, or respiratory tract. Polyvinyl chloride dust accumulation can present a dust explosion hazard. Take necessary measures to limit dust production, and follow applicable regulations. Wear gloves when cutting or fabricating sheet

Hygiene measures: Handle in accordance with good industrial hygiene and safety procedures. Wash hands and other exposed areas with mild soap and water before eating, drinking, or smoking and again when leaving work. Do not eat, drink or smoke when using this product.

#### 7.2. Conditions for safe storage, including any incompatibilities

Storage conditions: Store away from incompatible materials. Store in a cool, dry, well-ventilated area, away from sources of extreme heat or fire. Note: Electrical build up is possible.

Incompatible products: Strong acids. Strong bases. Strong oxidizers.

#### 7.3. Specific end use(s)

Trim/Molding on the Exterior/Interior of buildings

## 8. Exposure controls and personal protection

### 8.1. Control parameters

The final product is considered an article and not hazardous in its final form under normal conditions of use according to 29CFR 1910.1200. The ingredients contained within this product are not expected to be bioavailable under normal conditions of use.

### 8.2. Exposure controls

Appropriate engineering controls : Provide adequate ventilation to minimize dust concentrations.  
Personal protective equipment : Safety glasses. Gloves. Insufficient ventilation (specifically with the accumulation of dust or vapors from molten product): wear respiratory protection.

Materials for protective clothing	Not required for normal conditions of use. As necessary when handling hot or molten sheet, wear protective clothing.
Hand protection	If handling hot or molten sheet wear insulated gloves, under normal conditions wear work gloves.
Eye protection	Chemical goggles or safety glasses when cutting or fabricating the product
Respiratory protection	Use NIOSH-approved air-purifying or supplied-air respirator where airborne concentrations of dust or vapors from molten product are expected to exceed exposure limits.
Other information	Use good personal hygiene practices. Wash hands before eating, drinking, smoking or using toilet. Promptly remove soiled clothing and wash thoroughly before reuse.

## SECTION 9: Physical and chemical properties

### 9.1. Information on basic physical and chemical properties

Physical state	: Solid
Appearance	: Finished Sheet/Board. White.
Odor	: Odourless
Odor threshold	: No data available
pH	: N/A (Solid)
Relative evaporation rate (butylacetate=1)	: No data available
Melting point	: Decomposes before melting
Freezing point	: N/A (Solid)
Boiling point	: N/A (Solid)
Flash Point	: N/A (Solid)
Auto-ignition temperature	: No data available
Decomposition Temperature	: No data available
Flammability (solid, gas)	: No data available
Vapour pressure	: <0.1
Relative vapour density at 20 °C	: N/A (Solid)
Relative density	: N/A (Solid)
Specific gravity	: 0.45-1.4
Solubility	: None
Log Pow	: No data available
Log Kow	: No data available
Viscosity, kinematic	: N/A (Solid)
Viscosity, dynamic	: N/A (Solid)
Explosive properties	: No data available
Oxidising properties	: No data available
Explosive limits	: Not applicable

### 9.2. Other information

No additional information available

## 10. Stability and reactivity

Reactivity: Hazardous reactions will not occur under normal conditions.

Chemical Stability: Stable at standard temperature and pressure. Sustained temperatures above 150°F may cause slow degradation.

Possibility Of Hazardous Reactions: Hazardous polymerization will not occur.

Conditions To Avoid: Direct sunlight. Extremely high or low temperatures. Incompatible materials.

Incompatible Materials: Strong acids. Strong bases. Strong oxidizers.

Hazardous Decomposition Products: Carbon oxides (CO, CO<sub>2</sub>). Hydrogen chloride. Toxic gases.

## 11. Toxicological information

### 11.1. Information on toxicological effects

The final product is considered an article and not hazardous in its final form under normal conditions of use according to 29CFR 1910.1200. The ingredients contained within this product are not expected to be bioavailable under normal conditions of use.

Acute toxicity: Not classified

Skin corrosion/irritation: Not classified

Serious eye damage/irritation: Not classified

Respiratory or skin sensitization: Not classified

Germ cell mutagenicity: Not classified

Carcinogenicity: Not classified

Reproductive toxicity: Not classified

Specific target organ toxicity (single exposure): Not classified

Specific target organ toxicity (repeated exposure): Not classified

Aspiration hazard: Not classified

Symptoms/injuries after inhalation: Not expected to present a significant inhalation hazard under anticipated conditions of normal use.

Symptoms/injuries after skin contact: Not expected to be a primary route of exposure. Risk of thermal burns on contact with molten product.

Symptoms/injuries after eye contact: Not expected to be a primary route of exposure. Excessive dust production at the time of cutting may cause minor eye irritation.

Symptoms/injuries after ingestion: Ingestion is not considered a potential route of exposure.

## 12. Ecological information

### 12.1. Toxicity

The final product is considered an article and not hazardous in its final form under normal conditions of use according to 29CFR 1910.1200. The ingredients contained within this product are not expected to be bioavailable under normal conditions of use.

12.2. Persistence and degradability: No additional information available

12.3. Bioaccumulative potential: No additional information available

12.4. Mobility in soil: No additional information available

12.5. Other adverse effects

## 13. Disposal considerations

Other information: Avoid release to the environment.

### 13.1. Waste treatment methods

Sewage disposal recommendations: Do not empty into drains; dispose of this material and its container in a safe way.

Waste disposal recommendations: Dispose of waste material in accordance with all local, regional, national, and international regulations.

## 14. Transport information

In accordance with ICAO/IATA/DOT/TDG

- 14.1. UN number Not regulated for transport
- 14.2. UN proper shipping name Not regulated for transport
- 14.3. Additional information
- Other information : Not regulated for transport

Overland transport Not regulated for transport  
Transport by sea Not regulated for transport  
Air transport Not regulated for transport

## 15. Regulatory information

### 15.1. US Federal regulations

The final product is considered an article and not hazardous in its final form under normal conditions of use according to 29CFR 1910.1200. The ingredients contained within this product are not expected to be bioavailable under normal conditions of use.

### 15.2. US State regulations

The final product is considered an article and not hazardous in its final form under normal conditions of use according to 29CFR 1910.1200. The ingredients contained within this product are not expected to be bioavailable under normal conditions of use.

## 16. Other information

Data sources	Other information		This document has been prepared in accordance with the SDS requirements of the OSHA
			Hazard Communication Standard 29 CFR 1910.1200.
			Within the meaning of the OSHA Hazard Communication Standard [29 CFR 1910.1200]: this mixture is not considered a hazard when used in a manner which is consistent with the labeled directions. This mixture is considered an article in its final form.

*This information is based on our current knowledge and is intended to describe the product for the purposes of health, safety and environmental requirements only. It should not therefore be construed as guaranteeing any specific property of the product.*

TIMBERTECH® PRO® DECKING

Explore premium decking in bold, beautiful colors with exceptional cap protection. Boards in these collections are covered from top to bottom and in the grooves with advanced Mold Guard® Technology to prevent moisture damage. Composed of up to 80% recycled material and offering color options ranging from solid to infinitely variable, the TimberTech PRO decking line doesn't disappoint.

PHOTO: Legacy Collection Ashwood

Legacy Collection

BOLD. DRAMATIC. UNIQUE.

Stand apart from run-of-the-mill decks with this stunning, artisanal collection. This decking features a complex blend of several colors, natural board-to-board color variation, and a hand-scraped texture that offers old world charm. Just as every tree found in nature is unique, every deck board in the Legacy Collection is unique.

Reserve Collection

AUTHENTIC. RECLAIMED. INSPIRING.

Turn up the volume on composite decking with the complex coloring and striking wood grain visual from the colors of the Reserve Collection. Inspired by reclaimed wood, the heavy wire-brush finish highlights the classic cathedral wood grain and offers better slip resistance than competitors.

\*Although TimberTech Advanced PVC decking is cooler to the touch than many other composite deck board products, all decking products will get hot in the sun. Additionally, the darker the decking color, the hotter it will feel. For hotter climates, consider choosing a lighter color.

All printed samples are carefully reproduced to be as close to the actual sample as possible. Actual colors may vary due to printing limitations.

Common Decking Terms

Color Blending

Subtle to bold streaking of lighter and darker colors to resemble premium hardwoods.

Capping

Surface layer that protects against mold, mildew, moisture damage, scratches, fading, and staining.

Grain Pattern

The texture and finish on the board, representing a variety of wood species and treatments.

Board Material

The material composition of the core, either Composite or Capped Polymer.

PRO TIP: For second floor applications or where the bottom of the board is visible, choose a 4-sided capped collection for best aesthetics.

# Metal Order & Care Information

## You've ordered a metal railing system, now what?

1. The first thing to do is simply to recheck your order, your billing and shipping, and most importantly, the Post Layout Drawing you should have. If anything is not lining up, please get in touch with us as soon as possible.
2. Wait to receive your tracking number. After you have received it, if it's saying "invalid" wait 24 hours and check again. Sometimes the numbers take some time for the carrier to log them into their tracking system. If after 24-48 hours it is still not showing up, feel free to reach out to us.
3. During the shipping process, it is important to have a plan in place for when you do receive the product. If you are installing it immediately, it may be beneficial to prep the worksite. If you are not installing it immediately, it will be important to have a place set aside for the product in a reasonably climate controlled environment.
  - a If you have a wood handrail, storing your product in a garage, for example, can cause the wood to absorb the humidity in the air and bow or swell. If your product is unfinished, it will be very important to be ready to finish and seal your wood within the first week.
4. If it's a larger order, likely you will have to sign for it. The carrier should reach out to you, however if you have noticed it is close or out for delivery and you have not received any information, feel free to call us or the carrier directly to find out when to expect the delivery.
5. Upon delivery, if there are any damages to the packing during transit, please report them to the driver and then please reach out to us immediately.
6. Once you have the product, it is always a good practice to open and examine the product. If you notice any defects, please contact us immediately. It is important to report shipping damages within the first week of delivery.
7. Now that the product has arrived, move it to the area you have prepared and continue onto the next step in your project. Typically this will be installation.

8. Depending on the location of your project, there is likely to be little to no maintenance over the years. Some common system needs are: yearly maintenance check or touch up of exterior wood products, using the Allen wrench to retighten any cable or rod runs that might have been stretched, or removal of dirt or leaf build up against the product.
- a In some circumstances your project may be on the coast or in a humid, salt water environment. As everyone knows, salt and metal don't typically mix well. However, Viewrail products on the coast are manufactured with marine grade metals and finishes. This means they are extremely resistant to salt corrosion and are built with these difficult conditions in mind. If your exterior project is in this salt water environment, there may be just a little additional maintenance. We recommend applying our Marine 31 Polish and Sealant to exposed stainless steel, specifically the cables as they have a lot of ridges and surface area. This adds a layer of protection between the steel and any salt build up.
  - b If you notice salt build up on your post or cables, you can usually wipe this down with a rag and a stainless steel cleaner. The Marine 31 Polish works well. Sometimes a surface rust can appear. Not to worry, surface rust is exactly what it sounds like, a surface condition. This does not mean your post is corroding, and nearly every time this can be removed. Simply use a stainless steel cleaner and a rag, and if that doesn't completely remove it you can use a Scotch-Brite pad for the more difficult areas.
  - c Other than this specific scenario, there isn't really maintenance to a metal railing system. You can have peace of mind knowing you have years and years of worry free, beautiful railing.

**Signature**

The best cable railing, just the way you want it.

**Express**

Premium railing, bought off the shelf to save time and money.

## Product Details

### About This Product

The Amerimax Home Products 10 ft. Aluminum Gutter features a baked-on, white finish to complement your home and durable aluminum construction for long life. Use this gutter to control runoff and help prevent foundation erosion. This gutter has a convenient, do-it-yourself length and is ideal for repairs, replacement and as an add-on to existing 5 in. gutter systems.

### Highlights

- [Calculate Everything You Need for 5 in. Gutter System HERE](#)
- Aluminum construction for durability
- Rust-free aluminum construction for durability with a baked-on white enamel finish for low maintenance; can be painted if desired to match any decor
- K style design to complement your home
- Use to control roof runoff, protect walls and help prevent foundation erosion
- Use to repair, replace or add on to an existing gutter system
- Convenient, do-it-yourself length
- Fits 5 in. gutter systems

### HARDIE® PLANK LAP SIDING

#### Manufacturer

*James Hardie Building Products, Inc.*

The products are manufactured at the following locations, with quality control inspections by ICC-ES:

- Cleburne, Texas
- Plant City, Florida
- Reno, Nevada
- Waxahachie, Texas
- Prattville, Alabama
- Peru, Illinois
- Pulaski, Virginia
- Tacoma, Washington
- Fontana, California
- Summerville, South Carolina

#### Compliance with the following codes

- 2006 thru 2021 International Building Code (IBC)
- 2006 thru 2021 International Residential Code (IRC)

For more information about other compliances and applicable uses, refer to ICC-ES ESR-2290

#### Features

- Noncombustible
- Dimensionally Stable
- Resists damage from pests
- Weather Resistant-Engineered for Climate®
- Impact resistant
- Sustainable

#### Use

Hardie® fiber-cement lap siding is used as exterior wall covering. The product complies with IBC Section 1403.9 and IRC Section R703.10. The product may be used on exterior walls of buildings of Type I, II, III and IV construction (IBC)

#### Description

Hardie® Plank lap siding is a single-faced, cellulose fiber-reinforced cement (fiber-cement) product. Hardie® Plank lap siding complies with ASTM C1186, as Grade II, Type A; has a flame-spread index of 0 and a smoke-developed index of 5 when tested in accordance with ASTM E84; and is classified as noncombustible when tested in accordance with ASTM E136.

#### Available Sizes

Product	Width (in)	Length	Thickness (in)
Hardie® Plank lap siding*	5-1/4, 6-1/4, 7-1/4, 8, 8-1/4, 9-1/4, 12	12 feet	5/16

\* HZ5: 9-1/4, 12 only available primed    HZ10: 5-1/4, 9-1/4, 12 only available primed.

Weight 2.31 lbs. per square foot

#### Texture & Finish

Hardie® Plank lap siding comes in a variety of textures and finishes. The product is available in smooth or wood grain texture. Additional textures are available on a regional basis. Finish options are primed for field paint, or factory finished with ColorPlus® Technology. Color availability varies by region.

#### Engineered for Climate®

Hardie® Plank lap siding is engineered for performance to specific weather conditions by climate zones as identified by the following map.

Performance Properties

	General Property	Test Method	Unit or Characteristic	Requirement	Result
PHYSICAL ATTRIBUTES	Dimensional Tolerances	ASTM C1185	Length	± 0.5% or ± 1/4 in	Pass
			Width	± 0.5% or ± 1/4 in	
			Thickness	± 0.04 in	
			Squareness	Δ in diagonals ≤ 1/32 in/ft of sheet length. Opposite sheet sides shall not vary in length by more than 1/32 in/ft	
			Edge Straightness	≤ 1/32 in/ft of length	
	Density, lb/ft³	ASTM C1185		As reported	83

	Fire Resistance Rated Construction	ASTM E119	Fire Resistance Rating	1-hour	Note 1

Note 1: listed on Warnock Hersey and ESR 2290

Installation

Install Hardie® Plank lap siding in accordance with:

- Hardie® Plank lap siding installation instructions
- ICC-ES ESR 2290
- Requirements of authorities having jurisdiction

Warranty

Hardie® Plank lap siding: 30-year, Non-Prorated, Limited Warranty  
ColorPlus® Technology: 15-year Limited Finish Warranty

Sustainable Design Contribution

- Regionally sourced content- varies by project location
- Avoidance of certain chemicals or Red List Compliance

Detailed product information for LEED projects, or other state or regional sustainability programs is available through James Hardie Technical Services.

Storage and Handling

Store flat and keep dry and covered prior to installation.

Technical Services

Contact James Hardie Technical Services online at JamesHardie.com, or by phone at (800)426-4051

**IMPORTANT:** Failure to install and finish this product in accordance with applicable building codes and James Hardie written application instructions may affect system performance, violate local building codes, void the product-only warranty and lead to personal injury. **DESIGN ADVICE:** Any information or assistance provided by James Hardie in relation to specific projects must be approved by the relevant specialists engaged for the project eg. builder, architect or engineer. James Hardie will not be responsible in connection with any such information or assistance.

**GAF** Timberline**HDZ**<sup>®</sup>  
High Definition<sup>®</sup> Lifetime<sup>®</sup> Shingles

## America's #1-selling shingle just got better — again

With GAF time-release algae-fighting technology and LayerLock<sup>®</sup> technology, Timberline HDZ<sup>®</sup> offers everything you can expect from an architectural shingle roof, and more.

## Benefits:

- **LayerLock® technology** — mechanically fuses the common bond between overlapping shingle layers
- **Up to 99.9% nailing accuracy** — the StrikeZone® nailing area is so easy to hit that a roofer placed 999 out of 1,000 nails correctly in our test<sup>1</sup>
- **WindProven™ Limited Wind Warranty** — when installed with the required combination of GAF accessories, Timberline HDZ® shingles are eligible for a wind warranty with no maximum wind speed limitation<sup>2</sup>
- **Dura Grip™ sealant** pairs with the microgranule surface of the StrikeZone® nailing area, and an asphalt-to-asphalt monolithic bond cures for durability, strength, and exceptional wind-uplift performance
- **25-year StainGuard Plus™ Algae Protection Limited Warranty** against blue-green algae discoloration.<sup>3</sup> Proprietary GAF time-release algae-fighting technology helps protect your shingles from unsightly stains.
- **For the best look** — use TimberTex® premium ridge cap shingles or TimberCrest® premium SBS-modified ridge cap shingles

### Product/System Specifics

- Fiberglass asphalt construction
- **Dimensions (approx.):** 13 1/4" x 39 3/8" (337 mm x 1,000 mm)
- **Exposure:** 5 5/8" (143 mm)
- **Bundles/Square:** 3
- **Pieces/Square:** 64
- **StainGuard Plus™ Algae Protection Limited Warranty**<sup>3</sup>
- **Hip/Ridge:** TimberTex®; TimberCrest®; Seal-A-Ridge®; Z®Ridge; Ridglass®<sup>4</sup>
- **Starter:** Pro-Start®; QuickStart®; WeatherBlocker™

### Applicable Standards & Protocols:

- Passes UL 2218 Impact-Resistance Test with Class 3 rating
- UL Listed to ANSI/UL 790 Class A
- State of Florida Approved
- Classified by UL in accordance with ICC-ES AC438
- Meets ASTM D7158, Class H
- Meets ASTM D3161, Class F
- Meets ASTM D3018 Type 1
- Meets ASTM D3462<sup>5</sup>
- Miami-Dade County Product Control Approved
- ICC-ES Evaluation Reports ESR-1475 and ESR-3267
- Meets Texas Department of Insurance Requirements
- Rated by the CRRC: Can be used to comply with Title 24 Cool Roof Requirements (some colors)

<sup>1</sup> Lifetime refers to the length of warranty coverage provided and means as long as the original individual owner(s) of a single-family detached residence [or eligible second owner(s)] owns the property where the qualifying GAF products are installed. For other owners/structures, Lifetime coverage is not applicable. Lifetime coverage on shingles requires the use of GAF Lifetime shingles only. See the *GAF Shingle & Accessory Limited Warranty* for complete coverage and restrictions. Visit [gaf.com/LRS](http://gaf.com/LRS) for qualifying GAF products. Lifetime coverage on shingles and accessories requires the use of any GAF Lifetime shingle and at least 3 qualifying GAF accessories. See the *GAF Roofing System Limited Warranty* for complete coverage and restrictions. For installations not eligible for the *GAF Roofing System Limited Warranty*, see the *GAF Shingle & Accessory Limited Warranty*. Visit [gaf.com/LRS](http://gaf.com/LRS) for qualifying GAF products.

<sup>2</sup> Results based on study conducted by Home Innovation Research Labs, an independent research lab, comparing installation of Timberline HDZ® Shingles to Timberline HDZ® Shingles on a 16-square roof deck using standard 4-nail nailing pattern under controlled laboratory conditions. Actual results may vary.

<sup>3</sup> 25-year WindProven® Limited Wind Warranty on GAF shingles with LayerLock® technology requires the use of GAF starter strips, roof deck protection, ridge cap shingles, and leak barrier or attic ventilation. See *GAF Roofing System Limited Warranty* for complete coverage and restrictions. Visit [gaf.com/LRS](http://gaf.com/LRS) for qualifying GAF products. For installations not eligible for the *GAF WindProven™ Limited Warranty*, see the *GAF Shingle & Accessory Limited Warranty*.

<sup>4</sup> 25-year StainGuard Plus™ Algae Protection Limited Warranty against blue-green algae discoloration is available only on products sold in packages bearing the StainGuard Plus™ logo. See *GAF Shingle & Accessory Limited Warranty* for complete coverage and restrictions and qualifying products.

<sup>5</sup> Harvest Blend colors are only available on TimberTex® Ridge Cap Shingles, Seal-A-Ridge® Ridge Cap Shingles, and TimberCrest® Premium SBS-Modified Ridge Cap Shingles.

<sup>6</sup> Periodically tested by independent and internal labs to ensure compliance with ASTM D3462 at time of manufacture.

**Note:** It is difficult to reproduce the color clarity and actual color blends of these products. Before selecting your color, please ask to see several full-size shingles.

We protect what matters most™

# TILT-WASH DOUBLE-HUNG FULL-FRAME WINDOWS

## FEATURES

### Frame

**A** Exterior outer frame members are covered with a Perma-Shield® rigid vinyl cladding, minimizing maintenance and providing an attractive appearance.

**B** For exceptional long-lasting\* performance, sill members are constructed with a wood core and a Fibrex® material exterior. Sill ends are protected and sealed with weather-resistant covers.

**C** Natural wood stops are available in pine and prefinished white, dark bronze and black.\*\* A new, taller sill stop increases performance to PG40 while still maintaining egress on our most popular sizes.

**D** A factory-applied rigid vinyl anchoring flange on the head, sill and sides of the outer frame helps secure the unit to the structure.

**E** An extruded rigid vinyl jamb liner and fin provide a protective seal against the outer frame members. Exclusive slide wash assists make it easy to tilt sash into wash mode position.

Unique block-and-tackle balancers feature sized-to-the-unit, rust-resistant springs that require no adjustment. Glass-reinforced nylon balancer shoes provide smooth, reliable sash operation. Sash can be removed, without tools, for drywall pass-through. Jamb liners are available in white or gray and must be specified when ordering. Contact your Andersen supplier for details.

**F** Weatherstrip throughout the unit provides a long-lasting, energy-efficient, weather-resistant seal. For the top and bottom rails, an encased foam material is used. The head jamb liner and sill have a rigid vinyl rib that the weatherstrip material compresses against. At the meeting rail, compressible vinyl bulb material is used. Side jamb liners use leaf-type weatherstrip with foam inserts.

### Sash

Wash assists make it easy to tilt the sash into wash mode.

**H** Wood sash members are treated with a water-repellent preservative for long-lasting\* protection and performance. Interior surfaces are unfinished pine. Low-maintenance prefinished white interiors are also available.

**G** A polyester-stabilized coat with a Flexacron® finish is electrostatically applied to penetrate all exterior surfaces for maximum protection and a lustrous finish.

**I** Sash joints simulate the look of traditional mortise-and-tenon construction inside and out.

### Glass

**J** Silicone bed glazing provides superior weathertightness and durability.

**K** High-Performance glass options include:

- Low-E4® glass
- Low-E4 HeatLock® glass
- Low-E4 Sun glass
- Low-E4 SmartSun™ glass
- Low-E4 SmartSunHeatLock glass

Tempered glass and other glass options are available. Contact your Andersen supplier.

A removable translucent film helps shield the glass from damage during delivery and construction and simplifies finishing at the jobsite.

### Patterned Glass

Patterned glass options are available. See page 12 for more details.

## EXTERIOR

## INTERIOR

Naturally occurring variations in grain, color and texture of wood make each window one of a kind. All wood interiors are unfinished unless a prefinished option is specified.

## HARDWARE FINISHES

Distressed bronze and oil rubbed bronze are "living" finishes that will change with time and use.

## DOUBLE-HUNG HARDWARE

### STANDARD

Lock & Keeper

Black | Gold Dust | **Stone** | White

Stone is standard with natural interior units. White comes with prefinished white interiors. Other finishes optional.

## OPTIONAL DOUBLE-HUNG HARDWARE\*\*

### ESTATE™

Lock & Keeper

Optional Estate lock & keeper reduces the clear opening height by 1/16" (14). Check with local building code officials to determine compliance with egress requirements.

### CONTEMPORARY

Bar Lift

Antique Brass | Black | Bright Brass  
Brushed Chrome | Distressed Bronze  
**Distressed Nickel** | Gold Dust  
Oil Rubbed Bronze | Polished Chrome  
Satin Nickel | Stone | White

### TRADITIONAL

Bold name denotes finish shown.

\* Visit [andersenwindows.com/warranty](http://andersenwindows.com/warranty) for details.

\*\* Dark bronze and black interiors are only available with dark bronze and black exteriors respectively.

"Flexacron" is a registered trademark of PPG Industries, Inc.

Dimensions in parentheses are in millimeters.

Printing limitations prevent exact replication of colors and finishes. See your Andersen supplier for actual color and finish samples.

## StormWATCH<sup>®</sup> PROTECTION

400 Series tilt-wash double-hung full-frame windows are available with Stormwatch<sup>®</sup> Protection. Visit [andersenwindows.com/coastal](http://andersenwindows.com/coastal) for more details.

### Performance Grade (PG) Upgrade

A high inside sill stop\* with exterior sill brackets and hidden interior brackets are available to provide additional structural support for tilt-wash units, allowing standard glass units to achieve higher performance grade ratings. Performance Grade (PG) Ratings are more comprehensive than Design Pressure (DP) Ratings for measuring product performance. Use of this option will subtract 3/8" (15) from clear opening height. PG Upgrade not available for 72" (1829) and 76" (1930) heights. Contact your Andersen supplier for availability. For up-to-date performance information of individual products, please visit [andersenwindows.com](http://andersenwindows.com).

### Sash Options

Cottage

Reverse Cottage

For more information about glass, patterned glass, art glass, grilles and TruScene insect screens, see pages 12-14.

For more information about combination designs, product performance, installation instructions and accessories, see pages 181-211 or visit [andersenwindows.com](http://andersenwindows.com).

## ACCESSORIES Sold Separately

### Frame

#### Extension Jamb

Standard jamb depth is 4 1/2" (114). Extension jambs are available in unfinished pine or prefinished white. Some sizes may be veneered.

Factory-applied and non-applied interior extension jambs are available in 1/16" (1.5) increments between 5 1/4" (129) and 7 1/8" (181). Extension jambs can be factory applied to either three sides (stool and apron application) or four sides (picture frame casing).

#### Pine Stool

A clear pine stool is available and ready for finishing. The tilt-wash stool is available in 4 9/16" (116) for use in wall depths up to 5 1/4" (133) and 6 9/16" (167) for use in wall depths up to 7 1/8" (181). Works with 2 1/4" (57) and 2 1/2" (64) wide casings.

### Hardware

#### Window Opening Control Device

A recessed window opening control device is available factory applied. It limits the sash travel to less than 4" (102) when the window is first opened. Available in stone, white and black. A field-applied window opening control device is also available.

### Grilles

Grilles are available in a variety of configurations and widths. For double-hung grille patterns, see page 84.

### Security Sensors

#### VeriLock<sup>®</sup> Sensors

VeriLock sensors are available in five colors. See page 15 for details.

#### Open/Closed Sensors

Wireless open/closed sensors are available in four colors. See page 15 for details.

### Glass

#### Andersen<sup>®</sup> Art Glass

Available for 400 Series tilt-wash transom and picture units. Andersen art glass panels come in a variety of original patterns. See pages 173-174 for details on Andersen art glass. Visit [andersenwindows.com/artglass](http://andersenwindows.com/artglass) for details and pattern information.

#### Storm/Insect Screen Combination Unit\*\*

A self-storing storm window combined with an insect screen provides greater energy efficiency, while allowing ventilation when needed.

Constructed with an aluminum frame, single-pane upper and lower glass panels and charcoal powder-coated aluminum screen mesh. Available in white, Sandtone and Terratone to match product exteriors. Canvas, forest green, dark bronze and black available by special order.

Combination units can improve Sound Transmission Class (STC) and Outdoor Indoor Transmission Class (OITC) ratings. Ideal for projects near airports, busy roadways or other noisy environments. For example, adding a combination unit to a 400 Series tilt-wash double-hung (3862) unit with Low-E4<sup>®</sup> glass will improve its STC rating from 26 to 32. Contact your Andersen supplier for additional STC and OITC rating information.

### Insect Screens

#### Insect Screen Frames

Full and half insect screens are available for most unit sizes. Frame colors match product exteriors. Half insect screen (shown above) allows ventilation without affecting the view through the upper sash. Not available on windows with Stormwatch Protection.

#### TruScene<sup>®</sup> Insect Screen

Exclusive Andersen TruScene insect screens provide over 50% more clarity than our conventional insect screens for a beautiful unobstructed view. They allow more fresh air and sunlight in, while doing a better job of keeping out small insects.

#### Conventional Insect Screen

Conventional insect screens have charcoal powder-coated aluminum screen mesh.

### Exterior Trim

This product is available with Andersen exterior trim. See pages 175-180 for details.

#### CAUTION:

- Painting and staining may cause damage to rigid vinyl.
- Do not paint 400 Series windows with white, canvas, Sandtone, forest green, dark bronze or black exterior colors.
- Andersen does not warrant the adhesion or performance of homeowner-applied paint over vinyl or other factory-coated surfaces.
- 400 Series windows in Terratone color may be painted any color lighter than Terratone color using quality oil-based or latex paint.
- For vinyl painting instructions and preparation, contact your Andersen supplier.
- Do not paint weatherstrip.
- Creosote-based stains should not come in contact with Andersen products.
- Abrasive cleaners or solutions containing corrosive solvents should not be used on Andersen products.

\* Infringes on the overall net clear opening. Unit clear operable area may not meet egress requirements. See your local building code official for more information.

\*\* Do not add combination units to windows with Low-E4 Sun glass, unless window glass is tempered. Combination units may also reduce the overall clear operable area of the window. See your local code official for egress requirements in your area.

† Values are based on comparison of Andersen double-hung window conversion kit U-Factor to the U-Factor for clear dual-pane glass non-metal frame default values from the 2006, 2009, 2012, 2015 and 2018 International Energy Conservation Code "Glazed Fenestration" Default Tables.

Dimensions in parentheses are in millimeters.

Specified equal light and custom patterns are also available. For more grille options, see page 13 or visit [andersenwindows.com/grilles](http://andersenwindows.com/grilles).

## Tilt-Wash Double-Hung Window Details

Scale 1 1/2" (38) = 1'-0" (305) – 1:8

### 310 & 46 Height Windows Only:

Upper Sash Meeting Rail (higher location on 310 and 46 heights)

Lower Sash in Open Position (opens higher to maintain clear opening)

Meeting Rail

Note: Location of support bar on optional insect screen aligns with meeting rail location on 310 and 46 window heights.

- Light-colored areas are parts included with window. Dark-colored areas are additional Andersen® parts required to complete window assembly as shown.
- Rough openings may need to be increased to allow for use of building wraps, flashing, sill panning, brackets, fasteners or other items. See installation information on pages 210-211.
- Details are for illustration only and are not intended to represent product installation methods or materials. Refer to product installation guides at [andersenwindows.com](http://andersenwindows.com).
- Dimensions in parentheses are in millimeters.
