March: 0 **April:** 14 **May:** 9

Outbreak Investigations Closed:

March: none
April: none
May: GI, COVID-19

Outbreak Investigations Opened:

March: none
April: 2-COVID-19, GI Vius
May: none

-School/child care center immunization audits concluded on 4/1/26, immunization audits contributed to the lack of community outreach and blood pressure screenings
-Our VFC program had it's NJDOH VFC Site Visit/Audit in April with the following noted: 0 inventory discrepancies noted, 10 out of 10 patient records reviewed and all were found compliant with VFC

eligibility screening and documentation requirements. We will be working on the following items this upcoming year to improve our Child Health Conference: confirming the eligibility noted at time of visit is reflected in NJIIS and is up to date. We will be working on keeping our vaccine waste/expiration as low as possible, this will be achieved by continuing to look ahead at future clinics when ordering our VFC vaccines, asking to transfer vaccines that will be expiring before use, not ordering vaccines that we don't normally use but instead ask to transfer one from another VFC is needed

-We will be preparing education for all of our childcare centers and schools from now until the start of the 2026-2027 school year as immunization requirements will be changing
