

**Administrator School Board Update 2/14/23**  
**Michelle McClellan, Assistant Superintendent**

Curriculum, Instruction, Assessment

- We've moved through a critical stage in our Math Curriculum Review process - The Review Committee spent a day analyzing and synthesizing multiple data sets, developing a comprehensive assessment of our Math program, its strengths and opportunities for improvement. It's clear that our students overall perform at high levels in Math, particularly when compared to peers across the state and nation. This is truly something to be proud of and take time to celebrate - what great accomplishments for our students and teachers!
- In light of the large percentage of students who perform at the highest level on the NWEA, the Committee is examining the Math programs currently used to determine their effectiveness in meeting the specific and unique needs of our students. Recommendations are being finalized and an Implementation Plan is being developed during the month of February. The School Board will hear from members of the Math Steering Committee at an upcoming meeting.
- Recent increase in enrollment and needs of incoming students have led to the need for additional support staff in our Multilingual Learners department. An additional ed tech will cover as a long term sub through the end of the year, working with students in regular classrooms as they adjust, in some cases, to formal schooling for the first time and a new language.

Celebrate the Good

- Every great organization has certain staff who serve critical roles without fanfare or attention. Andrea Fuller no doubt serves this role at CESD. Shout out to you, Andrea! We so appreciate your willingness and ability to cover as needed, always with a smile on your face and a can-do attitude.

Upcoming Events

- Dr. John Hattie workshop with the CESD principals
