Re: Powers Road Feasibility Study Update and Discussion

Pat and Town Council Members,

In the 2021 Fort Williams Park Master Plan Update, recommendations were made and subsequently developed and prioritized by the Fort Williams Park Committee. Each year, the committee addresses these priorities through the itemization of projects in the Fort Williams Capital Plan. One such project was the Powers Road Feasibility Study. This project went out to bid and was awarded to Gorrill Palmer Consulting Engineers.

The FWPC has received periodic updates from Gorrill Palmer, with the final report submitted in November 2024. After receiving the report and presentation, the committee suggested a workshop with the Town Council to discuss the project and future options.

I have attached the final report and invited the vendor to the workshop for a brief presentation followed by discussion.

Respectfully,

Kathy Raftice
Director, Fort Williams Park
