Hi Paul,

Thank you for bringing this to our attention! I know the Planning Board is recommending some technical changes to ordinances soon, and perhaps this is a matter they could look into as they go through that process. I am cc'ing Maureen O'Meara to pass along the message, along with the state's lighting technical assistance bulletin:

<https://www.maine.gov/dacf/municipalplanning/docs/lightingmanual.pdf>.

Best,
Nicole

Hello Town Council:

I live at [3 Oak Knoll Road](#) in Cape Elizabeth and in discussions with the code enforcement officer it was brought to my attention that there are no ordinances in the Town re light pollution from neighbors that affect sleeping and quality of life of abutters or neighboring properties.

I think that this needs to be addressed moving forward perhaps having excessive lighting limited to certain times of evening and degree of intrusion.

Thank you for taking this into consideration.

Paul Barresi
