

# Administrator School Board Update

April/22

The Technology Department is committed to supporting the teaching and learning throughout the district. We support every student. We are also committed to assisting all staff members to be able to focus on meeting student needs.

## Department update:

- We are currently reviewing Copiers and copier costs. The lease for the copiers is ending, so we are providing information and collaborating with the Business Department to move forward.
- We have received two 3D printers for Pond Cove. These are supporting student learning by bringing some of their designs to life.
- We've prepped devices for the upcoming Maine Science Assessment.
- We are updating the policies on our [new platform](#). This makes the policies searchable and ADA compliant.
- We are currently identifying and organizing devices that are no longer used within the district.

## Monthly Program Data

- Leeza Joiner is supporting Pond Cove to connect technology support to the Seed Project. She is also working with students to record videos to support their learning.
- Hannah Hyde has been co-teaching in the 5th Grade with an Article of the week project. She has also been working with the 7th and 8th grade on Student Lead Conferences.
- Thomas Farmer has been surveying and interviewing staff and students on technology use and preferences moving forward.

## Celebrate the Good

- We are able to get into more and more classes. It's wonderful to be able to work directly with teachers and kids.

## Upcoming

- MLTI device selection
- Planning and preparing for device collection
- Organizing devices for recycling
