

Greenbelt Trails (4114)

\$19,000

This account is used for purchasing supplies and services to maintain the greenbelt trail network. The Town Planner and the Conservation Committee manage this account and again request funding at \$19,000.

The Conservation Committee will be conducting a greenbelt trail capital improvement assessment this summer (2020). The assessment is funded in the FY 2020 budget. Following completion of the assessment (September 1), the Conservation Committee anticipates a major effort to extend and replace boardwalks. In many cases, boardwalk projects will necessitate obtaining state permitting and a major impetus of the trail assessment is to apply for master permits that include multiple projects.

Although not included in this account, the Conservation Committee strongly supports the 1/2 time seasonal trail maintenance contracted work.
